THIS IS UNEVALUATED INFORMATION

In early August restrictions were imposed on the use of power in Peiping and
Tientsin because of Allied raids on Yalu River power plants.

Comment. Power is generated in Peiping and Tientsin by a number of
thermal plants. The coal to supply these plants is probably obtained from
local mines. For this reason, it seems unlikely that the use of power in
Peiping and Tientsin was restricted because of raids on Yalu River power plants.
